

Where is INPT located?

The Institut National des Postes et Télécommunications (INPT) is located in Rabat, Morocco.

INPT's website: [inpt.ac.ma](http://inpt.ac.ma)

What is INPT?

The Institut National des Postes et Télécommunications (INPT) is a prestigious engineering school located in Rabat, Morocco. It specializes in training engineers in the fields of telecommunications, information technology, and related disciplines.

What does INPT stand for?

INPT stands for: Institut National des Postes et Télécommunications.

What are the fields of study at INPT?

In INPT, there are 7 fields: data science, cybersecurity and digital confidence, smart information and communication technology (ICT), innovation and AMOA engineering, advanced software engineering for digital services, embedded systems and digital service, engineering of ubiquitous and distributed systems – Cloud and IoT.

Why should someone choose INPT?

The INPT is recognized for its excellence in engineering education and its role in preparing highly skilled professionals in the fields of telecommunications and information technology.

How can I study in INPT?

Access to the 7 fields of study in the Engineering Cycle is available to students:

who have passed the National Common Entrance Exam for Engineering Schools (CNC - MP, PSI, and TSI tracks), for admission to the 1st year;

who have passed the entrance exam for admission to the 1st year open to holders of a DEUG, DEUST, DEUP, or DUT diploma in the fields of Mathematics and/or Physics and/or Computer Science;

who have passed the entrance exam for admission to the 2nd year open to holders of a Bachelor's degree in the fields of Mathematics and/or Physics and/or Computer Science, after obtaining a DEUG, DEUST, DEUP, or DUT diploma.
